Brandon Rene Reza García

Resumen

Currently I have knowledge in several programming languages (JAVA, PHP, JavaScript, Node.js) and related fields (Linux, Bash scripting, Vim, HTML, CSS, Bootstrap, Thymeleaf, MySQL, SQLite, Git, Apache, etc.) Creation of websites, implementations of OpenSource projects, development, construction, testing and improvement of applications - these are the number of skills that I work with every day and in which I am constantly improving my skills.

Skills

- Comunication
- Teamwork
- Project Management
- Creativity
- Problem Resolution
- Leadership

Work Experience

Software Engineer - 2022 – At the moment
HSBC México, Toluca, Edo. Méx.

- Ensure that the solution designed in each project is scalable, secure and easy to maintain. Likewise, consider the performance requirements, the integration with other systems and the user experience.
- Ensure that Software Development best practices are followed, including documentation, version control, testing and implementation. Likewise, identify technical risks, anticipating possible problems and taking preventive measures to avoid them.
